

27th December, 2020

Dear A-level Coordinator,

I am a retired South African university teaching academic looking for opportunities to contribute to A-level education with subject interests: Mathematics, Further Mathematics, Computer Science and Physics.

I currently live in South Africa in the Natal midlands and I hold both South African and UK passports.

Throughout my career, I have taught across the Computer Science and Mathematics disciplines at undergraduate level. I have supervised many graduate projects and undertaken a variety of contract work.

I am currently working on a Covid-19 dashboard using Julia as the programming platform. You can view this dashboard at:

<https://reproduction.live/world>

I am also developing a set of A-level notes to cover the Cambridge syllabus for Mathematics and Further Mathematics. This is a work in progress and I would welcome the opportunity to work with A-level teachers to improve these notes. Please don't hesitate to email me if you are interested in taking this further.

For further details about me please visit my personal website at:
